Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.

DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. All claims are generally narrative and indefinite, failing to conform to current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Applicant is required to amend or rewrite all of the claims.

Claim 1, it is not distinct whether the load cable and the turning mechanism are actually parts of the claimed combination. Positive identification of the load cable and the turning mechanism is required. It is not distinct which element actually provides the turning function for the crane. The actual structural elements for the claimed crane cannot be distinctively ascertained from the language of the claim. It is not distinct, which "starting points" Applicant is referring. "the set points" lacks antecedent basis. "the track control" lacks antecedent basis. The phrase "such a away" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. It is not distinct which "it" Applicant is referring.

Claim 2, "the model base optimal control trajectory" lacks antecedent basis. The phrase "can be" renders the functions indefinite. It is not distinct whether the claimed functions are actually part of the claimed combination.

Art Unit: 3651

Claim 3, the second positive recitation of "a model based optimal control trajectory" renders the claim indefinite because it is not known whether a second trajectory control is actually being claimed. It is not known which "reference trajectories" Applicant is referring.

Claims 4-20 suffer similar problems.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-20, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Nishioka et al. (EP 1314681).

Nishioka et al. '681 disclose an automated oscillation controlled crane per claimed invention.

Conclusion

5. Additional references made of record and not relied upon are considered to be of interest to applicant's disclosure: see attached USPTO Form 892.
